# Product features for Finance & Reporting

It doesn't matter if you're a startup business with just one vehicle, or a multi-national delivery service with thousands. We've designed **TPLUS™ CLOUD** to grow as you do and be right there with you.

## Every step of the way

With rich features designed for your management and operation needs, you can be sure that **TPLUS™ CLOUD** has been developed specifically to meet the demanding requirements of the ever-growing transport and courier industries.

### 1 Customer and Invoice Management and Drivers and RCTI's

**TPLUS™ CLOUD** has got you covered with our fully integrated debtors system. Managing client invoicing, driver pays, RCTI's, invoice payments, payment matching, debtors financial reports and more has never been easier!

With **TPLUS™ CLOUD**, you can keep track of jobs that are in progress or completed and turn them into billable items in no time. This means you can raise customer invoices and driver RCTI and send them via email as soon as the job is completed.

Handling all aspects of your business's debtors is a breeze - from inputting payments to generating financial reports.

The best part? **TPLUS™ CLOUD** makes running weekly, fortnightly, or monthly customer invoices or driver pays a breeze. So, you can spend less time on paperwork and more time growing your business.

### 2 Payments Management

**TPLUS™ CLOUD** supports a wide variety of payment types. Including credits, credit notes, debits, and more.

Plus you can easily disperse payments across multiple periods with ease, and with the payment to invoice matching feature, you'll never have to scramble to match a payment to the right invoice again.

Track and manage outstanding invoices, letting you pay single or multiple invoices with ease, whether you need to short pay, over pay, or apply credits.

### 3 Reports Management

You'll have access to hundreds of purpose-built reports that can be easily customised to meet your daily needs.

Our reports include client reports, aged trial balances, vehicle and driver reports, GPS reports, financial and debtors reports, job reports, job KPI performance, proof of delivery, email, fuel levy, schedule, job analysis, sales, profit and loss, and many more.

Plus you can save and store your reports in native PDF and CSV formats, Text, and other formats.

Our reporting includes visual graphing which provides valuable, easy to read, business intelligence on all types of event data generated by **TPLUS™ CLOUD**.

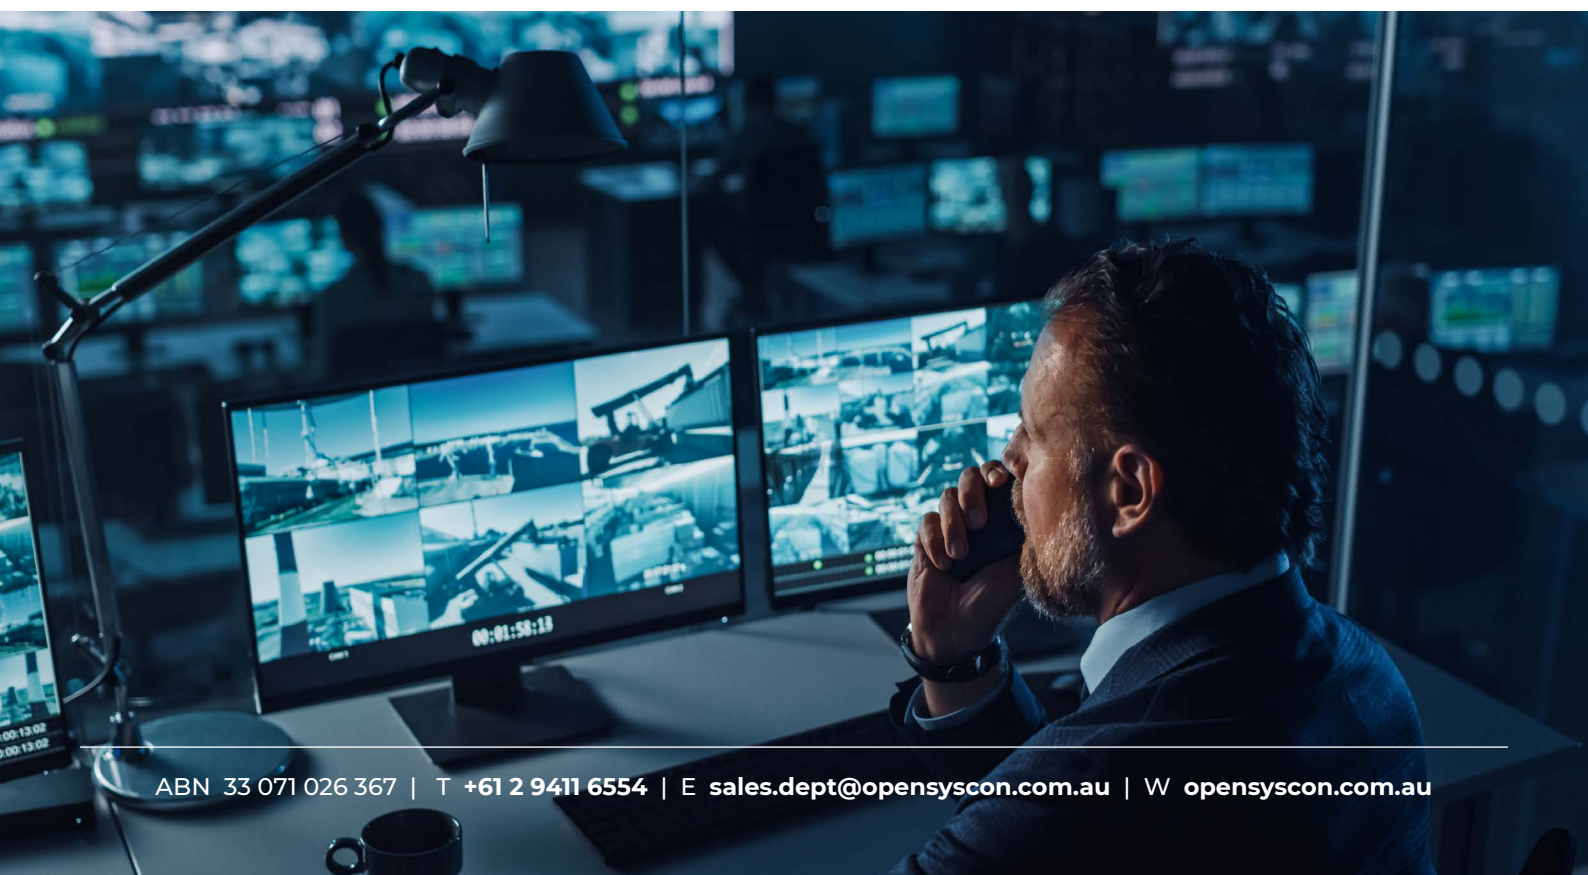

And your customers also have access to web-based reports through the **TPLUS™ CLOUD** Customer Web Portals and Dashboards. Allowing your customers to monitor their performance and make informed business decisions.

### 4 Business Intelligence

As businesses continue to expand and gather more data, the use of business intelligence (BI) tools such as Power BI has become increasingly popular to provide up to the minute business data visualisation.

**TPLUS™ CLOUD** enables seamless integration with various popular BI systems, allowing for real-time, event-driven feeds to be sent to BI web services.

With **TPLUS™ CLOUD**, organisations can create visually appealing reports and dashboards that provide valuable insights to clients allowing you to make data-driven decisions, track performance, and gain a competitive edge in the transport market.

## For your management team

**TPLUS™ CLOUD** enables businesses to gain a deep understanding of their financial performance in real-time.

With its user-friendly interface, businesses can easily access and analyse the financial information they need to make informed decisions, streamline their operations, and drive growth.

One of the key features of **TPLUS™ CLOUD** is its built-in tools that simplify and automate financial tasks. From invoicing and payments to receipting and taxation, businesses can manage their financial operations more efficiently and effectively than ever before.

The platform provides advanced reporting capabilities that give your business a detailed view of your financial performance, including real-time financial statements, gross profit reports, and more.

Highly configurable reports give businesses the ability to track their performance, identify trends, and make data-driven decisions—wherever you are—customised to suit your specific needs.

**TPLUS™ CLOUD** offers advanced integrations with a wide range of popular business intelligence systems, allowing businesses to leverage their valuable data in new ways.

With real-time, event-driven, and direct API feeds, businesses can combine the power of **TPLUS™ CLOUD** with their existing tools to create beautiful visual reports and dashboards that can be shared with clients and stakeholders.

Empower your business to gain real-time insights into your financial performance, streamline their operations, and make data-driven decisions.

With its user-friendly interface, built-in tools, and advanced reporting capabilities, **TPLUS™ CLOUD** is the perfect solution for businesses looking to take control of their finances.

# Customer Success Stories

For more than 18 years Open Systems has developed our transport software system to the ever expanding requirements of our business.

Steve and his staff have always been supportive to our needs, providing technical support and effective solutions whenever required (even after hours - being the nature of the transport industry).

**CHARMAIN RIMENE**  
**CEVA (Aust) Pty Ltd**

The functionality of the TPLUS™ CLOUD is extremely impressive and handles every need that we have and so much more, the customer service from Open Systems Consulting is fantastic, and the staff are always ready to help you in any way they can.

We're extremely happy with Open Systems Consulting and would highly recommend them to anyone looking for an effective, efficient and easy to use transport system.
